WORK EXPERIENCE

TP ICAP

Financial analyst - Big Data + Equity research - Internship

January 2024 - July 2024

Paris, France

- Implemented big data analytics for equity research, to uncover investment opportunities and pricing discrepancies over a portfolio of 243 listed equities in 18 stock exchanges. Developed forecasting models for micro and macro trends.
- Conducted quantitative research of 7 MSCI indexes, and evaluated financial performance of listed equities and indexes. Established client relationships, monitored market trends, and authored 10+ summaries of research and market insights.

PKF Arsilon

Financial modelling and valuation consultant - Internship

June 2023 - December 2023

Paris, France

- Built 10+ Excel, CapitalIQ Pro, and VBA valuation models for equities, bonds, management packages, and other contracts. Utilized advanced techniques like trinomial trees and Monte Carlo simulations.
- Analyzed financial data and business plans to value 10+ companies and other different types of financial assets. Applied relevant valuation techniques and conducted research on comparables.

EY - Technology Consulting

Data & analytics consultant - Internship

July 2021 - August 2022

Bogota, Colombia

- Implemented algorithms for data analysis in Python and R, including simulation of yield and risk scenarios using statistical models for 4 types of assets. Contributed to the development of data science tools.
- Created 10+ data-driven reports and dashboards as client deliverables, which implied compilation, preparation, and analysis of different data sources into Power BI. Supported the design of databases and mathematical modelling.

ADDITIONAL EXPERIENCE AND ACHIEVEMENTS

Finance and Investment Club Uniandes (FIC)

Finance student association of the University of the Andes

March 2020 - November 2021

Bogota, Colombia

- Created and managed an international Fintech podcast "Fintech: Byte-Sized" with 12 episodes and over 1800 listens, by researching, developing topics, and conducting interviews.
